Ask your distributor about custom RX pads that meet your state requirements

Secure RX Pads

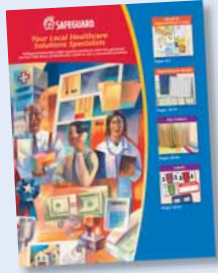

Safeguard's secure prescription pads help protect against counterfeiting.

"We've used Safeguard products in our practice since 1988 – everything from cabinetry to statements, HCFA (CMS 1500) forms and checks – to manage our office more efficiently. Although the products themselves are good quality, it's the service that's phenomenal. Our distributor is responsive and always comes up with a good solution to our issues. Also playing a large role in the community, Safeguard is committed to their business and their clients. I would have to say that the way they conduct their business is like good bedside manner, always greeting me and my staff with a smile. As a physician, service means more to me than anything else and Safeguard knows that."

Dr. Joe Assaley, M.D.
